

# Medical Centers that Specialize in the Treatment & Study of PF

We have assembled a list of medical centers that have specific expertise in the treatment of PF.

This list includes medical centers that are recognized as Institutes of Excellence by the National Institutes of Health (NIH), medical centers that regularly participate in large scale clinical trials in PF, medical centers that

have specialists who are widely published for their research and treatment of PF, medical centers that have departments devoted to PF care, and, in some cases, practices that our patients have provided exceedingly positive feedback about the care that they have received.

52 Centers | 27 States

## Alabama

University of Alabama at Birmingham Birmingham, AL

## California

David Geffen School of Medicine @ UCLA Los Angeles, CA  
University of California—Davis Medical Center Sacramento, CA
